Gateway 2nd Edition is designed to lead teenage students to success in exams. It also prepares students for further study and the working world.

In this new edition we've kept many of the features that have made Gateway so popular. But Gateway 2nd Edition has several exciting new features, such as the Flipped classroom videos and a new focus on Life skills. Meanwhile Gateway 2nd Edition offers brand-new, up-to-date texts to motivate you and your students.

And for all these features, new and old, we've refreshed the design and made it even clearer and easier to use.

I hope you and your students will enjoy teaching and learning with Gateway 2nd Edition!

START THE TOUR

Let's look at a walkthrough...

• Vocabulary and Reading

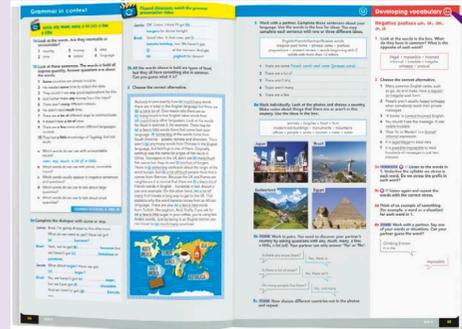

The themes and topics are designed to appeal to teenagers, and are introduced clearly at the beginning of each unit.

Typical reading tasks include exam-style comprehension questions such as multiple-choice, True / False or inserting sentences into a text.

• Grammar in context and Vocabulary

The **Flipped classroom** grammar presentation video provides a versatile learning tool, and an alternative grammar presentation which gives students greater control over their learning.

The second vocabulary set focus on word-building and other aspects which help students to analyse and understand how vocabulary works.

• Gateway to life skills

Gateway to life skills lessons equip students with the necessary transferable skills for life beyond the classroom

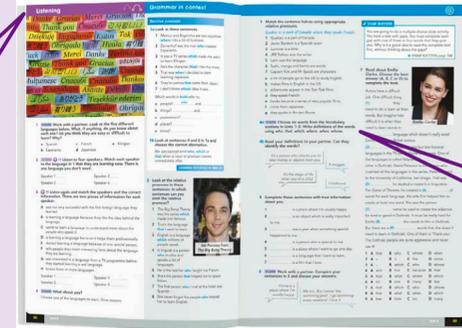

The engaging videos present a mixture of real teenagers and subject experts talking about the Life skills topics.

The **Life skills** lesson culminates in a productive **Life task**.

• Listening and Grammar

Students listen to a wide range of realistic recordings including dialogues, radio programmes, adverts and interviews.

Students are given lots of opportunities to use new grammar in active, oral communication.

• Speaking and Writing

The **Developing speaking** lesson develops students' oral skills with a highly-structured approach to speaking.

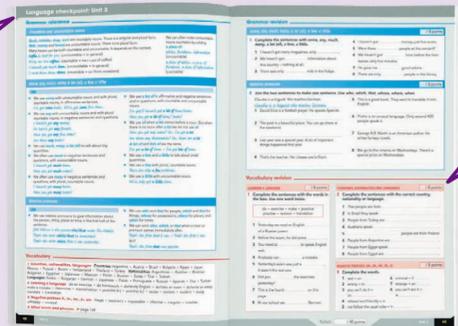

Students are given help in planning and organising the information they need to use in their writing activities. Model texts give students realistic examples of different genres of written texts.

The **Exam success** boxes ask students to reflect on the best way to carry out a specific exam.

• Language checkpoint

Each unit has a **Language checkpoint** with tables and explanations for quick reference or deeper reflection. Students can revise for progress tests by referring to these reference pages throughout the book.

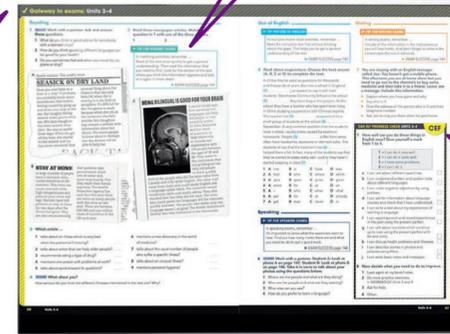

The grammar and the vocabulary revision sections can be used for self study as well as in class.

A Gateway to success!

• Gateway to exams

Every two units the **Gateway to exams** pages allow students to test their progress and at the same time develop their skills through targeted training tasks for exams.

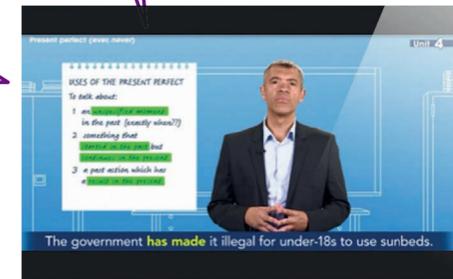

Useful exam tips cover all of the skills – **Writing, Speaking, Listening, Reading** and give guidance for **Use of English** tasks.

The **Can do' progress check** encourages students to measure their own progress.

• Flipped classroom

Flipped classroom videos offer an engaging grammar presentation making new structures accessible through examples, timelines and diagrams.

By presenting grammar to students outside of class time, the **Flipped classroom** approach allows for more lesson-time practice.

The **videos** are an efficient resource for teachers, since they can be used flexibly for mixed-ability groups or for revision.

• Life skills videos

The **Life skills videos** form part of the Life skills lessons. They show British teens demonstrating or discussing the Life skills topics in a way that has direct relevance to all students' lives.
