## Water.

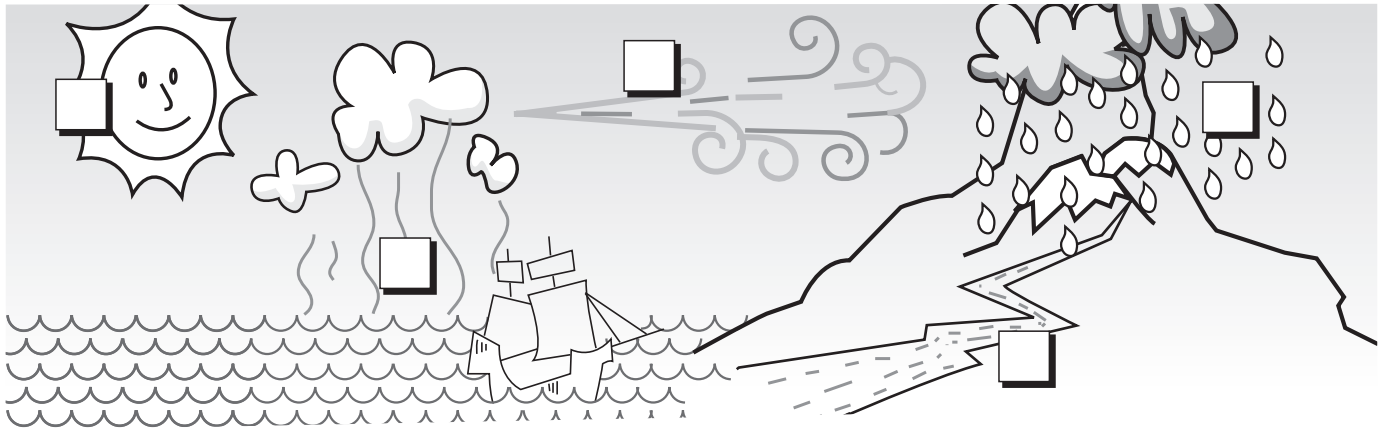

### 1 Read. Complete the text with the words in the box.

blue      water      oceans

#### Water in nature

Water is everywhere. 97% of the water is in the (1) \_\_\_\_\_ but there is also water in the sky, in the ground, in lakes and in rivers. The Earth is called the (2) \_\_\_\_\_ planet because 70% of the Earth is covered by (3) \_\_\_\_\_.

### 2 Read and number the pictures.

#### The water cycle

In nature water moves in a cycle.

- 1 The sun heats the water in the sea.
- 2 The water gets hot, evaporates and forms clouds.
- 3 The wind blows the clouds.
- 4 The clouds meet the mountains and it rains. The rain goes into the rivers.
- 5 The rivers go to the sea.

### 3 Read and label the picture.

solid    liquid    gas

#### Water states.

Water can exist in three different states: solid, liquid and gas.

When the temperature is below 0°C, water changes into a solid (snow and ice).

When the temperature is above 0°C, ice melts and changes into a liquid (water).

When water gets hot, it evaporates and changes into a gas (water vapour)
