#### Shadow Puppets

Shadow puppets were first created in China over one thousand years ago. Eventually, they became popular in many countries, including Japan. The first shadow puppets **(1)** \_\_\_\_\_ made of leather, but later paper **(2)** \_\_\_\_\_ used. The paper was cut into detailed designs. Traditionally, shadow puppets were **(3)** \_\_\_\_\_ to perform plays that were usually accompanied by music. They were **(4)** \_\_\_\_\_ to represent figures such as royalty, heroes and different animals. Sometimes, the performance **(5)** \_\_\_\_\_ staged by many people. The people who operated the shadow

puppets could move many puppets at the same time, which was not an easy task.

Today, it's easy for children to make their own shadow puppets and perform a play. When a shadow play is performed, there is no stage, only a white screen with a light behind it. Nowadays, the arms and legs of the puppets **(6)** \_\_\_\_\_ moved with sticks, strings or even straws. They are so easy and fun to make, why not give it a try?
