

## | How does *Lead the Way* incorporate the Sustainable Development Goals (SDGs)?

The 17 Sustainable Development Goals (SDGs) were adopted by the United Nations in 2015 as a universal call to action, with targeted goals to meet by 2030. The SDGs are based on the five pillars of people, the planet, prosperity, peace and partnerships.

The list below shows how *Lead the Way* incorporates topics related to one or more SDGs.

### **GOAL 4: QUALITY EDUCATION**

Macmillan Education's Advancing Futures Program responds directly to Goal 4: Quality Education and, in particular, Target 4.7, which addresses education for sustainable development, global citizenship, and appreciation of cultural diversity. Quality Education is at the heart of Macmillan's ELT materials and inspires us to make all of our content meaningful, accessible, and impactful.

Though Goal 4 is embedded in the approach to all of our materials, a wide variety of content related to other SDGs is also included in reading and listening texts, projects and interactive classroom activities. This content provides pupils with the foundation to understand our world and its citizens and, where appropriate, encourages the students to engage critically with the issues outlined in the SDGs.
